SHULTZ BELTING COMPANY, ST. I

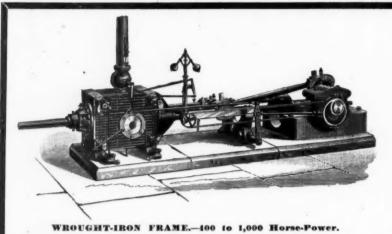

Manufacturers of Shultz Patent Fulled Leather Belting, Lace and Picker Leather.

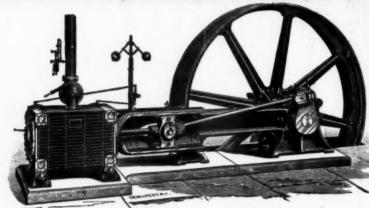

OUR BELTING is made of Leather, tanned on the surfaces only; the interior (which is the fibre and strength of the hide) is not tanned, but Rawhide fulled and softened by our patent process. Our belting is more pliable, and hugs the pulley better and transmits more power than any other Belt. It does not pull out at the laceholes or rivets. It stretches less than any other Belt. It works equally well for the largest Driving Belts or for the fastest running machinery and smallest pulleys. OUR LACE LEATHER is made of Rawhide, by our patent process, without any tanning and is stronger and will wear better than any other. WE ALSO MAKE THE BEST PICKER LEATHER AND BELT GREESE IN THE COUNTRY. Satisfaction guaranteed.

#### REYNOLDS-CORLISS ENGINE, We regard the

Built by E. P. ALLIS & CO., MILWAUKEE,

in a marked degree the best of its type in respect to the design of its details, its massive construction and very superior workmanship. We call especial attention to the wrought-iron bed, and invite examination of rking drawings, which can be seen at our office. Or we will send same with one of our engineers to any party contemplating a purchase. These drawings show the superiority of detail design in a manner that cannot approached in any advertisement or correspondence. Mr. Edwin Reynolds is probably at this moment the most successful designer of heavy COMPOUND CONDENSING ENGINES in the country. The high-type BUMPING ENGINES, high-speed BLAST ENGINES (with Reynolds' patent metal air valves) and SEWAGE PUMPS, built by the above concern, represent the most advanced engineering. They also build engine designed especially for high-speed service in rolling mills, having a positive valve motion, cut-off ranging to ½ stroke and speed variable while running. The company makes a specialty of heavy work, being by equipped with large tools. Having been appointed SOLE REPRESENTATIVES OF MESSRS. E. P. ALLIS & CO., we will estimate as such on heavy engineering construction for Cotton Mills, Rolling lls, Steel Works, Blast Furnaces, Water Works, Municipal Improvements, &c. Send for our Circular of the Reynolds-Corliss Engine, giving comparative illustrations of details.

WESTINGHOUSE, CHURCH, KERR &

#### THE AMERICAN PAPER PULLEY

has a driving power over three times as great as cast or wrought iron, or wooden pulleys. It will be found a complete remedy for slipping, over strained, and short belts, and does away with tighteners altogether. Our tests shout this to be the most raduable improvement ever made in pulleys. Weight, one-half of iron Freight less. Impossible to break. Single and double belt and double arm. We are competitive bidders on complete mill outfits of pulleys and shafting. Also paper friction wheels, friction filters, and polishing wheels. We make a specialty of difficult cases in transmission, either by belt or friction.

SENT THE

Steel Co. LIMITED,

#### Of Pitts burg, Pa. Manufacturers of FINE CRUCIBLE STEELS.

The "STERLING SPECIAL" Tool Steel is intended for the service usually required of the best foreign brands, and will be found a very superior steel. We also offer the "STERLING EXTRA" Tool, Best Die Steel, in bars or blocks, Rock Drill Steel, Crank Pins, Frog Bars, and Shape Forgings. The works are under the immediate supervision of Mr. C. Y. WHEELER, which is a sufficient introduction to the market. We particularly cask the attention of parties having severe requirements not estimated in the supervision of the supervisions, a special mix will be made to meet same, regardless of quantity used. We will be pleased to make quotations, and solicit a trial order.

WESTINGHOUSE, CHURCH, KERR & CO.

Manufacturers and contractors often find dissatisfaction and difficulty in executing work from an and advice which are purely professional, since such advice not only does not lie under Mancial responsibility for the work, but may at the same time invalidate the responsibility the contractor. Believing that the entire responsibility, both engineering and financial, uld be inseparable.

# WESTINGHOUSE, < CHURCH, KERR & CO.

# HANICAL ENGINEERS,

Generation, Transmission & Application of Power,

And contract for the erection of same on their own capital and responsibility. OUR BUSINESS is conducted in three departments, each of which is under the detail supervision of the Principals.

CONSULTING MECHANICAL ENGINEERS.

We design, locate and supervise the operation of power plants; investigate, report upon, and design special applications of power, special machinery and processes; make expert tests of power, duty, &c.; inspect and supervise mechanical construction, &c. For this service we make a reasonable charge.

CONTRACTING ENGINEERS AND SALESMEN.

CONTRACTING ENGINEERS AND SALESMEN.

We design and contract for Boilers of all kinds; Engines, high or low speed, condensing, compound, and marine; heavy Pumping and Blowing Engines; Sewage Pumps; Rolling Mill Engines, &c.; heavy and light shafting, gears, pulleys, &c.; and special machinery. Our long experience in this business has naturally led up to the preference of certain special constructions (some of which are illustrated in the margin) as the best of their type. To enable us to handle these in competition, we have assumed the Selling Department of each by special contract with their respective makers. We handle nothing on Commission, but employ an ample capital to purchase outright and place the product at low figures for cash, bringing our own responsibility into every transaction. In this department we employ a competent force of engineer-salesmen, who are at the service of our customers on call. No charge is made for professional services in connection with our contracts.

PURCHASING AGENTS.

PURCHASING AGENTS.

We are thoroughly posted on the machinery market, in which we are discriminating cash buyers. This enables us to purchase machinery and supplies to order for our clients at closer figures than can be obtained by a buyer not on the ground. We insure bottom prices by taking no commission from the seller, but charge the buyer a small rate on the net purchase. Findly, we do not allow professional consideration to deter us from properly advertising our business.

ADVERTISING RATES:

BALTIMORE, APRIL 18, 1885.

CORRESPONDENCE relating to the manufacturing, mining, lumbering and all other material interests of the Southern States is solicited. Reaching so many capitalists in all parts of the United States seeking profitable investment in the South, the MANU-FACTURERS' RECORD offers an excellent chance for the people in that section to place the advantages of each locality before those likely to be interested. We will take great pleasure at all times in telling what has already been accomplished in the South, and showing up the opportunities of doing still more.

J. W. Sloss, Birmingham, Ala., president of the Sloss Furnace Co., owner of two furnaces having an aggregate annual capacity of 60,000 tons, says that as soon as the demand and prices for iron improve, his company will build one or two new furnaces.

THE Iron Trade Review, Cleveland, Ohio, has published a chart, showing on one side the prices of pig iron at Cleveland for 13 years and on the other side the shipments of Lake Superior iron ores for 27 years.

THE MANUFACTURERS' RECORD, published in Baltimore, Md., is a newspaper that is exclusively devoted to the progress of the South, the de velopment of its great resources, and the building up of Southern manufactures.—New Era, Blountsville, Ala.

ADVERTISERS wishing to reach the manufacturers of all classes, mining companies, steel, iron and hardware dealers of the entire South, cannot find a better medium than the BALTIMORE MANUFACTURERS' RECORD. We are always prepared to furnish proof of our claims as to circulation.

### Activity in Furnace Building in the South in the Near Future.

The people who persistently claim that there is no profit in making iron at the South, will doubtless be rather surprised at the very large increase to be made in the number of Southern furnaces. At Dayton, Tenn., two furnaces, of 100 tons capacity each, are under construction; at Anniston, the Woodstock Iron Company will build two 100-ton furnaces: at Birmingham the Pratt Coal and Iron Co. will build two, and we understand have already given orders for part of the machinery. The Mary Pratt Furnace Co., of Birmingham, it will be remembered, lately wrote to the MANUFACTURERS' RECORD that they would shortly build an additional furnace, and it is now stated by Col. J. W. Sloss, president of the Sloss Furnace Co., that as soon as the iron business revives, his company will build one and possibly two furnaces. Mr. Samuel Thomas, president of the Thomas Iron Co., previously reported as contemplating the investment of about \$1,000,000 in a furnace and other iron industries near Birmingham, to develop his extensive mineral property, intends to do so; but under date of March 31, wrote to the editor of this paper that the probabilities were against his doing so this year. A contract has been made for a 100-ton furnace to be erected at Sheffield, Ala., as soon as the proper railroad facilities have been secured, and there are prospects for still more furnaces in Alabama and Tennessee in the near future. It can readily be seen what a heavy increase will be made in Southern pig iron production by the erection of these furnaces. There must certainly be a good many people who have faith in the ability of Southern furnaces to make money.

The outlook for the industrial growth of the South continues very favorable, and, as soon as business revives, a decided activity in the investment of money in the South by Northern and European capitalists may be expected. The preparations for the building of so many furnaces show that there is already a better feeling among business men, and that some of them at least are looking for an early improvement. The building of these eight or ten large furnaces will be a very important event in the industrial history of the South.

J. W. Henley, of the Virginia Tin Company, lately stated to a reporter of the Lynchburg News "that his company had the biggest thing ever discovered in the United States." He said "that they had gotten out from 1,500 to 1,800 tons of ore since Christmas which would average 30 per cent., and were now getting out from 35 to 40 tons a day. One of the veins has exceeded their most sanguine expectations. It was thought that it would only be 4 feet in width, but it turns out to be fully 120 feet wide and of very fine ore. As soon as possible the company will erect a furnace and smelt the ore."

#### The Financial Troubles at Norfolk.

The failure of several large banking institutions at Norfolk, Va., due to the outrageous mismanagement of one of these banks, by which one firm was enabled to borrow \$1,200,000 from it, when, according to the law, no firm should be allowed to become indebted to a national bank to an amount greater than one-tenth of the bank's capital stock, which in this case would have been \$30,000, has produced much trouble in that city and caused some despondency as to the future. Doubtless this is very natural under the circumstances, and for a while there may be considerable business depression in Norfolk, but there is no danger, we think, of any permanent injury of magnitude to the trade and commerce of that port. Norfolk is splendidly located for foreign commerce as well as for domestic trade, and her natural advantages, combined with the wellknown energy and enterprise of her merchants will be sure to enable them to recover from any temporary loss of business. The city is still there, the splendid railroad and steamship facilities and all other advantages hertofore possessed, except the loss of considerable capital, are all there. With confidence restored, as it soon will be, Norfolk will again push forward in the upbuilding of her trade and commerce, entirely overcoming in a short time the effect of the late disasters, which, it should be remembered, were not due to the lack of profit in business but to other

### The Atlanta Commercial Convention.

The address published in another column in relation to the proposed Commercial Convention to be held in Atlanta, Georgia, in May, is well worthy of consideration. A gathering of business men in a convention of this character to discuss purely business matters ought to be productive of great good. It is important, in fact, essential to the success of the convention that it should be composed of representative men in all lines of industry, and unless the attendance of men of this kind can be secured, it would be much better to abandon the project. We anticipate, however, that Atlanta, which is capable of great things, will be equal to the task that her business men have undertaken. Outside of the good to be derived by general business interests from this convention, is the great good that the South will secure by the presence of many Northern and Western capitalists and manufacturers. They will be able to see for themselves that the half has never been told of the South's vast undeveloped resources. Their investigations in this line will almost surely lead to large investments in Southern property or in Southern enterprises.

#### Advertising by States.

The States of Texas and Florida are spending much money and printer's iak in advertising their advantages and attractions for immigrants. They desire new people, and they are ready to spend time and money to secure them. They have great inducement, and they are fully aware that it pays a State as well as it does an individual to advertise, knowing that all money thus spent comes back many fold into the treasury in the way of additional revenue. Tennessee, with much greater advantages and resources than any of these, seems to be largely trusting to people finding it out for themselves. Her commissioner has done as well as he could with what he had, and her exhibits at Boston and at New Orleans have repaid their cost many times over. The State is not disposed to spend very much money in that way, and the railroads with one exception are doing but little to encourage immigration by arranging excursions or otherwise; nor under the condition of things during the past two years could they be expected to do so. They have done all they could in the way of free transportation of men and material; consequently it depends largely on the owners of mines and minerals hade. commissioner has done as well as he could portation of men and material; consequently it depends largely on the owners of mines and minerals beds, quarries, water power and other resources needing development to furnish the money for this advertising, and there is no investment they can make that will pay them as well.—Union, Nashville.

Florida, we believe, is doing more to attract immigration than any half a dozen other Southern States. Florida and its attractions are heard of everywhere and tens of thousands of dollars are spent by the business men and the railroads of that State to advertise its advantages. The Florida papers are probably more liberally supported in proportion to population than any other papers in the country; they are crowded with local advertisements, and as a natural result they are able to do great good in attracting attention to the State. We believe that the present enormous immigration to Florida will be far exceeded within a few years and that that State will be one of the most prosperous in the Union. While Florida is thus reaping the advantages secured by the enterprise of her people, it is to be regretted that the other Southern States are doing so little to set forth their resources and attract immigra-

Col. Bennett H. Young, president of the Kentucky Union Railroad, in a late address upon the need of more railroads in Kentucky, said:

"The developed wealth of Kentucky is immense, but when compared to her undeveloped wealth it sinks into insignificance. Her coal fields are the best in the world. Already she produces one-thirtieth of all the coal in the world. She has two boundless coal fields—one in the eastern portion of the State and one in the western. That in the eastern portion of the State is far superior to that found in the western, yet there was no coal mined in the eastern portion when compared to that taken from the western. Why? Because Western Kentucky had better facilities for transportation. The coal mines in Kentucky are more safely and easily worked than those of any other State. With greater railroad facilities Kentucky could furnish better and cheaper coal than any other State in the Union, The coke interests of Kentucky are almost as great as those of Pennsylvania, yet for lack of the proper railroad facilities we must depend on Pennsylvania for our coke. Kentucky has inexhaustible oil fields, yet she produces only seven barrels per day. The reason is evident. There are only six States that have more iron in their territory than Kentucky, yet Kentucky furnishes only one eight-hundredth of all the iron to the manufacturing world. Her timber resources are greater than that of any of the adjoining States, yet for a lack of proper railroad facilities her timber could not be utilized."

#### The Exposition.

[Special correspondence Baltimore Manufacturers' Record.]

NEW ORLEANS, LA., April 10, 1885.

If those critics who deny or doubt the correctness of the RECORD's figures on the industrial growth of the South, would visit the Exposition at this time, they would be made to believe that if there is an error at all in these statements it is in placing the amount of the increased wealth too low.

In most of the Southern States the exhibits are of such a character as to show, beyond the shadow of a doubt, that the industries of this section are becoming almost as varied as the natural resources, while the display of mineral, agricultural and forestry products demonstrate conclusively the great possibilities of the future. Some one in making a comparison between the exhibits at this Exposition and those at the Atlanta Exposition of 1881, called attention to the fact that at the latter the chief feature in Southern departments was cotton, while here it is grain and fruits, thus showing much greater diversity in the crops than exhibited prior to 1881, and I may add to this statement that while comparatively little attention was given at Atlanta to manufactured products, considerable space has been filled here with specimens from the cotton and woolen mills, the iron foundries and the coal mines. Nor does this department close with the products mentioned, but exhibits representing the smaller industries are conspicuous. In both the Government and the Main Buildings there are displays from cotton-seed oil mills, from machine shops, from carriage factories, from shingle mills, from turpentine stills, from hosiery factories, from bagging factories and from many smaller enterprises that have developed in the past few years.

Nothing has surprised visitors more than the mineral and timber resources of the South, which are fully illustrated in the State exhibits. The coal and iron from Alabama and Tennessee, the gold, silver, iron, lead and copper ores from Georgia, North Carolina, Tennessee and South Carolina, and the wonderful variety and quality of the woods from all the Southern States, show to the capitalist the room there is for the investment of money, while the full exhibits of the products of the mines and factories in operation show that the stream of gold is already flowing in this direction.

Among the new industries represented in the Main Building is the

CHALMETTO MILLS OF NEW ORLEANS.

This mill produces cotton-seed oil, crude and refined, cotton-seed cake and meal, cotton goods and commercial fertilizers, and they are exhibiting a full line of their goods.

Messrs, G. Ober & Sons Company, of Baltimore, own an interest in these mills, and the high reputation their fertilizers have obtained throughout the country is fully maintained in the goods put out by them here. They can easily purchase all the crude materials needed in the different branches of manufacture in this State, except the phosphate rock used in their fertilizers, and this comes from South Carolina. Having such advantages as these, and being located at the place where the greatest amount of their products are consumed, there is every reason to suppose that the mills will be successful.

Opposite the Chalmetto exhibit is the exhibit made by the

#### MAGINNIS OIL MILL.

of New Orleans. This mill produces from the cotton seed, soap, oil, cake, meal and batting, the latter being made from the lint taken from the seed. This mill is said to be in a very prosperous condition.

There are eight cotton seed oil mills in this city, and all of them are prospering. They exchange with the farmer, one ton of commercial fertilizers in the spring for 3½ tons of cotton seed in the fall. Some of the mills exchange one ton of cotton-seed meal for two tons of seed. This is regarded by the agricultural chemist as a perfectly fair

arrangement for both sides. It is said that the oil in the seed, which is now considered a valuable commodity, prevents the rapid decomposition of the seed when they are used for fertilizing the crops, and that the meal, being free from this oil, is consequently far better for agricultural purposes than the unground seed, so that in having the oil expressed the farmer gets rid of a perfectly useless, if not hurtful ingredient, while the manufacturer obtains an important commercial product.

These mills have, within a very short period, sprung up thoughout the cotton belt, and so long as they return to the cotton farms the product of the seed, they will be of vast benefit to the agricultural interests of the South. One of the most attractive exhibits in the annex to the Machinery Hall is that of the

#### S. A. WOODS MACHINE COMPANY,

of New York, Boston and Chicago. It contains fourteen machines in all, including a heavy planing and matching machine, fast feed flooring machine, combined molding, tonguing and grooving machine, double and single surfacing machines, jointing and facing machine, large double iron saw table, two buzz planers of improved pattern, panel planer and knife-grinding machine,

The fast feed flooring machine, both in design and construction, is a creditable representation of the most advanced practice. It has been designed with special reference to high speed and fast feed, to meet the requirements of large mills, and at the same time produce the best work. To meet these requirements the greatest care has been bestowed on its construction, every part being proportioned with special reference to convenience of operating and durability. Besides these elements of excellence the machine embodies several novel features, of which an important one is a set feeding-out rolls beyond the cutter head.

The Woods Company claim a number of points of superiorty for their new pattern six roll double surfacer. It covers a large range of work, being capable of doing the finest shop planing as well as heavy work up to 12 inches in thickness and 24, 27 and 30 inches wide. The feed power has some peculiar and important features. It consists of six inch rolls, the upper train being driven direct from the feed shaft by a chain and the lower set by an oblique shaft, which is always in adjustment for any thickness, By thus driving both trains direct from the feed shaft, expansion gears are dispensed with and even feed is insured with less strain in the gear. The improved jointing machine is built of two sizes with table 5 feet 8 inches, or 7 feet long, to plane 12 to 16 inches wide. This machine will be found very convenient for planing out of wind, making glue joints, and for such miscellaneous uses as rabbeting, jointing, chamfering, beveling, grooving, squaring up, working beads, circular moulding, &c.

While this company has sold its machines all over the world the greater part of its trade heretofore has been in the West and Southwest, and the exhibit here was made more especially for the purpose of increasing the business in the South. It is gratifying to know that the company has accomplished its object and the gentlemen in charge are very well satisfied with the success they have achieved. The exhibit is under the charge of Mr. I. R. Joslin, Jr., and he is assisted by Mr. Henry Faxan, Jr. Mr. Joslin is the vice-president of the company, and has had 20 years experience in handling machinery.

Some efforts are being made to have the Exposition closed on the 31st of May, as advertised, and re-opened in December. Mr. Speed, the special commissioner from the World's Exposition at London, has been before the Board of United States Commissioners and urged these representatives of the States to transfer their exhibit to London. It is believed that if they are allowed to remain here during the summer, and exhibited for a few months in the winter, that

it will be much better than to break them up and return them to the various States. It is thought, too, that if it is known throughout the country that all of these exhibits are to remain, and that they will all be in position at the re-opening, that the attendance next winter will greatly exceed the number who have attended this season. The commissioners very generally favor this idea, provided financial arrangements can be made that will enable them to meet the expenses of maintaining their exhibits. While there is therefore a possibility that the Exposition may be re-opened next winter, no one who contemplates visiting New Orleans should stay away now on that account, or they might be greatly disappointed. The exposition is now at its best. Everything is fully arranged; the weather is lovely; the orange trees are blooming while the last season's fruit is still on the trees: the visitors are increasing and the daily receipts at the gates far exceed the expenditures. The accommodations in the city are ample and reasonable, and no better time could possibly be selected for a visit to the Queen City of the South than during the months of April and L. A. R.

### Notes & From & Dixie.

BY CHAS. H. WELLS.

The appointment of ex-Governor Jarvis, of North Carolina, as minister to Brazil, has caused great satisaction in the old North State. Mr. Jarvis was born in Currituck county, N. C., in 1836, and is, therefore, not yet fifty years of age. He was educated at Randolph Macon College, Va., where he graduated in 1860. He entered the Confederate service as a private, but soon rose to the rank of Captain. He lost the use of his right arm by a wound received at Drury's Bluff. Since the war he has served in various legislative bodies in this State, and in 1876 he was elected Lieut. Governor on the ticket with Z. B. Vance for Governor. In 1880 he was elected Governor, in which position he has served with ability for four years, his term of office expiring January 1,

In Macon, Georgia, the other day, a gentleman picked up a shining pebble from among the gravel on one of the public streets. It proved to be a rough diamond, and will be worth at least \$1,000 when cut. In Raleigh, N. C., last week, a negro boy picked up a rough, uncut diamond in the suburbs of the city. It has been sent North to be cut and will be worth from \$3,000 to \$5,000. The mineral wealth of the Piedmont region is certainly worth looking into if diamonds are to be found lying around loose.

The Piedmont Press says the First National Bank of Salisbury, N. C., has paid the stockholders thirteen per cent. in one-year and has a surplus of nearly \$8,000. With such a showing as this, would it not pay the Northern capitalists to invest in the banking business down here? There are good openings at Newton, Catawba county, N. C.; at Hickory and Statesville, N. C.; at Laurens, Greenwood and Greenville, S. C. Very few of these Southern banks earn less than twelve per cent. a year clear money above all expenses.

As an instance of what patient, energetic hard work will do, the Hickory, N. C., papers tell of a man named Cobb who, a few years ago, located on a little scrubby patch of land near that town. Now he is well off; has a fine farm and has raised seventy-five bushels of sweet potatoes on a quarter of an acre of ground. Taking \$1 a bushel as a fair average price, this land yields at the rate of \$300 per acre each year.

It is another illustration of the fact that the soil of Western North Carolina is capable of the highest development, and that the finest agricultural belt in the "State of the tar heels" is the one lying along the Western North Carolina Railway.

As an illustration of the extraordinary intellect of our "brother in black," of North Carolina, it is said that a darkey at Salisbury having heard that Ex-Governor Jarvis had been appointed "Envoy Extraordinary and Minister Plenipotentiary to Brazil," told another darkey that "Gub'nor Jarvis done been appointed extr'ordinary preacher to the penitentiary o' Brazil."

"The State Legislature of North Carolina has chartered a company and authorized the building of a new railroad from Shelby via Morganton to Cranberry with a line from Morganton via Lenoir to the Virginia State line in Ashe county, to connect there with the Shenandoah Valley road, now anxiously seeking an outlet in this direction. This would give an interior line from Baltimore this way due South via Shelby, Greenwood, to Augusta and Savannah." This paragraph is floating around among my exchanges, but as yet the railroad has not much chance of being built. The connection would be made with the "Norfolk and Western"-not the Shenandoah Valley-at some point just above Bristol, Tennessee.

The N. C. Association of School Teachers will meet at Black Mountain, on the W. N. C. R. R., June oth. A finer site for this gathering could not have been chosen, and the 300 ladies and gentlemen who annually meet in order to discuss how to "teach the young ideas" to shoot, will have a nice time. Black Mountain is sixteen miles from Asheville, three miles from Swannanoa tunnel and ten miles from Round Knob, in the midst of splendid mountain views and delightful landscapes. The Mount Mitchell Hotel where the assembly meets is a new building and one of the best finished and best arranged hotels in Western North Carolina, and Mr. Stepp, the genial proprietor, will "make it lively" for everybody.

An exchange says that a new firm under the title of "The Clingman Tobacco Cure Company," with almost unlimited capital, has been organized in Durham, N. C., to manufacture and sell the following preparations of tobacco: the Clingman tobacco cake, (which will simply be a cake of pure tobacco) the Clingman tobacco plaster, the Clingman tobacco liniment and the Clingman tobacco ointment. General Clingman has secured all of the above by trade mark, and he is now one of the company.

MR. R. G. PACE, Danville, Va., has patented a "Humane Stock Car," the object of which is to afford a means of watering and feeding horses, cattle, hogs, sheep, etc., in transit, without the necessity of going in the car. Railway officials who have examined the device have in every instance endorsed it. Mr. Pace is willing to sell an interest in the patent,

THE Roller Chain Belting Co., Columbus, O., have recently furnished a number of large saw and pulp mills with their roller chain for conveyers, drive belts, etc. They are now running full time, and report an increased business.

THE Pope Manufacturing Co., of Boston, have issued their spring catalogue. The book contains 52 pages, is handsomely printed upon fine paper and illustrated with nearly 70 engravings of the Columbia bicyles and tricycles, and sundries for the season just opening.

#### Gold and Silver Mining in the South.

NEW ORLEANS, April 3d, 1885. Editor Manufacturers' Record :

During my stay in this city and in attending the Exposition, my mind has been very strongly directed to the relative standing of the Southern States as a bullion-producing section, both past and present, together with the relative standing of each one of them as compared with the others, and the inducements which they now offer to the miner and the capitalist; and on investigation I find that the amount of gold mined in the Southern States from 1840 to 1850, or the time we began to feel the effects of the discovery of gold in California, was as follows:

North Carolin	ia						0			۰										.\$6,842,900
Georgia																				
Virginia		0					۰	9	0	0	9	0	۰	0		۰		۰		1,198,600
South Carolin																				
Tennessee and	ì	A	l	a	b	a	n	1	a		,		۰	0	0	0	0	0	0	263,800
T																				-

To the time from 1850 to 1880 it appears that no official returns are accessible in regard to the amount of precious metals produced by the Southern States.

The census report for the year ending May 31st, 1880, gives us the following figures in regard to the precious metals:

North Carolina p Georgia South Carolina Virginia Tennessee	orodue **	ced	. 81,029 . 13,040 . 9,321	Silver. \$140 332 50
		IN 1881.	Gold.	Silver.
North Carolina   Georgia South Carolina Virginia Tennessee	orodu	ced	\$115,000 125,000 35,000 10,000 5,000	*****
		1882.	Gold.	Silver.
North Carolina p Georgia South Carolina Virginia	orodu	ced	\$190,000 250,000 25,000	25,000

Average production of gold and silver during the census year per square mile in each of the Southern States:

North !	Car	ol	in	a						0 1					 						.\$	2.28

The latest official returns accessible include the first six months of 1883, which are estimated at the same output as the first-half of 1882, which will prove to be much below the actual production, as there has been an unusual activity in gold mining in Georgia, South Carolina and North Carolina, and during this time many discoveries have been made, and new mines opened, and many new improvements made in the modes of mining, and the machinery and plants put in operation which will raise the Southern States in the grade of bullion-producing sections, whilst the Western States and Territories show but little change in this respect, and I think that in consideration of all these improvements and discoveries that it is within the bounds of actual facts to estimate

the output of gold for the last two years to be more than double the rate of what is given officially for 1882. The abundance of cheap labor which can be obtained for from seventy-five cents to a dollar per day, including board, the mildness of the climate, almost without interruption during the enin almost every locality, and the nearness and accessibility of the section to Eastern and Northern markets, when taken into consideration with the immense amount of ores which, although many of them of low grade, yet others vie in value with some of their ore noted associates of the far West, as will be shown by the following analyses and discriptions of a few of the ores and mines of the South, prove emphatically that the South is now the most inviting field perhaps in the whole world for the enterprising miner and capitalist:

Nuriferous Galena from Stewart's mine, Union county, N. C. Gold, \$46.34; silver, \$6.55 per ton.
Gold ore from Fair's mine, Mecklenburg county, N. C. Gold, \$506.42; silver, \$6.52 per ton.
Gold ore from S. Wilson's mine, Mecklenburg county, N. C. Gold, \$23.24; silver, \$4.90 per ton.

which enables the miner to pursue his labor tire year, the cheapness and abundance of all kinds of supplies which can be procured

#### Horizontal Boring Machine.

This machine is adapted to a large variety of work, including rosette cutting and mor-tising. The latter is done by a cutter, cutting at both end and sides, producing, when the work is moved sideways, a mortise with half round ends.

The spindle is of steel fitted to a steel tube with which it revolves and in which it slides. The wear is thus confined to the tube where it can be easily taken up by the adjustable caps. When spindles slide in the same bearings in which they revolve they become smaller at one part than at another and a perfect adjustment is then impossible. The spindle has a longitudinal movement of six inches, and it is provided with an adjustable gibbed stop collar. The table has movemen of ten inches in the direction of the length of the spindle to enable it to be set close to bits of various lengths and to enable rosette and mortising cutters to be used close to the bearings; it also has a vertical movement of twelve, and a lateral movement of fourteen inches. The latter is

#### List of Patents

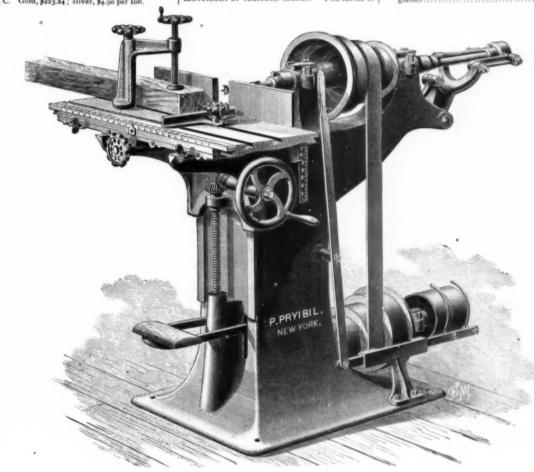

the Southern States, bearing date April 7, 1885. Reported expressly for this paper by Louis Bagger & Co., Mechanical Experts and Solicitors of Patents, Washington, D. C.

HORIZONTAL BORING MACHINE.

Gold ore from Double Branch mine, Polk county, N. C. Gold, \$23.77 per ton. Gold ore from Black mines, Mecklenburg, county, N. C. \$485.75; silver, \$2.37. Auriferous copper pyrites, Eureka mines, Randolph county, N. C. Gold, \$46.52 per ton; copper, 4.78 per cent. Gold ore, Rudisill mine, Charlotte, N. C. Gold, \$21.97; silver, \$0.53. Haile mine, Lancaster county S. C. copp.

Haile mine, Lancaster county, S. C., consisting of five distinct veins aggregating one hundred and eighty feet, as follows:

To which might be added scores of assays as made by the authorities of the United States Mint, and which can be referred to at any time, all go to prove that these mines offer greater inducements to the capitalist than any others in the country. SILEX.

ADVERTISERS wishing to reach the manufacturers of all classes, mining companies, steel, iron and hardware dealers of the entire Sout!, cannot find a better medium than the BALTIMORE MANUFACTURERS' RECORD. We are always prepared to furnish proof of our claims as to circulation.

ends for facilitating the application of special wooden fences, and with scales for setting to sizes. All the slides are provided with adjustable gibs and the main bearings with adjustable caps. The height of the treadle is adjustable to enable the operator to set it low when boring short holes, so that he will not have to raise his foot unnecessarily high. The loose pulley is self-oiling and the machine can be driven from above, below, or from either side. To accommodate any possible position of the belt, the belt shifter is fitted to both sides of the ma chine, so that it can be used on either, and the fork can be turned either up or down.

the fork can be turned either up or down.
The self-oiling tight and loose pulleys are 7 inches diameter for 3 inch belt, and should ran from 900 to 1,100 revolutions per minute. This machine is manufactured by P. Pryibil, manufacturer of wood-working machinery, shafting, pulleys, &c., 461 to 467 West 40th street, New York, who will furnish catalogues of machinery upon application.

Wilder, W. M., Franklin, Ga. Cotton-seed

LUTHERSVILLE, GA., April 8, 1885. Editor Manufacturers' Record

My shingle mill and Mr. J. T. Upshaw's saw mill were burned on the 24th ult., but are nearly rebuilt again. I am running two mills part of the time; cut of each, 3,000 feet per day. Timber scarce, and lumber at mill \$1 per 100 feet. Demand now mod-ALLEN CHANDLER.

# \*\*\*CONSTRUCTION DEPARTMENT.

E PUBLISH, every week, a list of every new factory, of whatever kind, projected anywhere in the South; every railroad undertaken, and every mining company organized. This information is always fresh, and, by enabling manufacturers to correspond with the projectors of such enterprises before their supplies of machinery have been purchased, is of great value. Manufacturers will find it to their interest to read this department carefully each week.

#### ALABAMA.

The Pratt Coal & Iron Co., of Birmingham, Ala., previously reported as intending to build two new furnaces, have given out contract for part of the machinery needed.

The Tecumseh Iron Co., Tecumseh, Ala., propose to alter their furnace, so as to use coke instead of charcoal in making iron.

The County Commissioners, Birmingham, Ala., have ordered plans to be prepared and reported in May for a new jail to be built in that city.

The Mabel Mining Co. has been organized at Warrior, Ala., with T. M. Davidson, president, and L. K. Moss, secretary, to mine coal and make coke. Capital stock \$50,000.

The Elyton Land Co., Birmingham, Ala, will build a 6-mile street railroad.

W. E. Michael, Demopolis, Ala., will build a saw mill.

The Sloss Furnace Co., Birmingham, Ala., intend to build another furnace as soon as the iron trade improves.

Figh & Williams have received the contract for enlarging the Statehouse at Montgomery, Ala., for \$20,000.

#### ARKANSAS

Capt. Alexander, Washington, Ark., is building a grist and planing mill.

The Helena Manufacturing & Laundry Co., Helena, Ark., has been incorporated (capital \$4,000) by J. P. Moore, S. H. Horner and others.

#### FLORIDA.

A company is being organized in Ocala, Fla., to build water works.

A brick yard is to be established in Bridgeport, Fla., and machinery is wanted. Address Mitchell Renz.

W. A. Macduff, Jacksonville, Fla., will erect a large warehouse.

#### GEORGIA.

Samuel Morgan, T. F. Howell, M. Graham and A. W. Walton have organized, at Rome, Ga., the Rome Compress Company, capital \$50,000.

Jas. M. Shepard, Stone Mountain, Ga., will build a flour mill to cost about \$4,500.

Pope Miller, Barnesville, Ga., has added a grist mill to his saw mill.

The Swift Manufacturing Co., Columbus, Ga., will erect an additional building for their cotton mill to be used in the manufacture of bed spreads.

Webb's Flour Mill, Gainesville, Ga., is nearly completed.

Atlanta, Ga., will build a \$12,000 school house.

It is reported that Geo. P. Swift, Columbus, Ga., will erect a large hotel.

J. L. Jarrell, Reidsville, Ga., will rebuild his flour mill lately burned.

#### KENTUCKY.

Geo. T. Thompson, reported last week as building a flour mill at Carrollton, Ky., should have been at Warsaw, Ky., a small town near the former place.

It stated that C. P. Huntington and others will buid a large Union depot at Louisville, Ky.

The Louisville & Nashville Railroad Company, it is reported, will immediately build two machine shops at Tenth and Zane streets, Louisville, Ky. Estimated cost \$60,000,

James H. Thorpe, W. G. Morris, R. L. Mannen and G. S. Bruce have organized at Covington, Ky., the Brunswick Stone and Marble Company, capital \$100,000.

The Eureka Gas Company, organized in New York, has submitted an offer to the Mayor & City Council, of Lexington, Ky., to build gas works in that city provided they are granted certain privileges.

The Champion Ice Company, Covington, Ky., are putting in a 50 ton ice machine.

The County Commissioners, Greenup, Ky., have decided to build two new iron bridges.

John Clark, Georgetown, Ky., has established a planing mill.

The machine shop of H. C. Kromwell, Cynthiana, Ky., was badly damaged April 9 by boiler explosion.

J. R. Osborne & Son, Owensboro, Ky., will enlarge their planing mill and put up a 2-story addition.

H. B. Lyon, Eddyville, Ky., and others have organized a company to establish extensive lime works near there.

It is reported that Archie Stewart, Covington, Ky., intends to organize an Edison electric light company.

Peter de Tamble, Charles Fisher, and Simon I. Loventhal have organized at Covington, Ky., the Cincinnati Forge & Iron Co., capital \$50,000, to manufacture iron, steel, &c.

Horton & Co., of Cincinnati, Ohio., manufacturers of firemens' supplies, &c., contemplate removing their factory to Lexington, Kv.

#### LOUISIANA.

A company is to be organized in New Orleans, La., as the Louisiana Terra Cotta Lumber Co., to manufacture terra cotta lumber.

#### MARYLAND.

The Cremation Cemetery Company, of Baltimore, has been incorporated by John W. Hall, Frank H. Hambleton, Charles Weber, Jr., Benjamin F. Horwitz, Henry G. Hilken, Louis Muller, Owen A. Gill, Charles Glaser, J. Alexander Preston, John W. Middendorf, Gustavus W. Lehman and John R. Rennous, to build a crematory. Capital stock \$15,000.

G. Cassard & Co., Baltimore, whose large pork packing house and lard refinery was lately burned, as reported, (loss about \$70,-000) are now rebuilding.

B. A. Betts, Chewsville, Md., will build a grain elevator.

The buildings of the St. Joseph's Academy, Emmittsburg, Md., lately burned, (loss about \$50,000,) will be rebuilt.

The Baltimore Baling Press Company, capital \$20,000, has been organized in Baltimore by Theodore G. Austin, Benjamin F. Smith, N. C. Unduch, John P. Ammidon and John B. Ramsay, to manufacture cotton and hay presses.

L. P. Haslup, carriage manufacturer, Baltimore, will erect a 4-story factory, 30x33 feet.

#### MISSISSIPPI.

C. C. McKinnon, Aberdeen, Miss., previously reported as intending with others to build a cotton seed oil mill, has organized a stock company for that purpose. S. H. Berg has received the contract for erecting the buildings. The report that efforts were being made to build a cotton compress at Memphis, was an error; it should have been at Yazoo City, Miss., the Illinois Central Railroad, which will build a line between Yazoo City and Memphis, intending, it is said, to locate a compress at the former place and not at the latter.

The Artesia, Starkville & Grenada Railroad Co. has been organized at Starkville, Miss., with L. D. McDowell, of that place, president. Object is to build a road from Grenada to Starkville,

#### NORTH CAROLINA.

Spurgeon & Hayworth, Abbott's Creek, N. C., have built a flour and saw mill.

J. M. Worth, Worthville, N. C., has been buying machinery for his cotton mill.

B. H. Cozart, Oxford, N. C., will erect a large brick tobacco warehouse.

The address of J. A. Sugg, reported last week as building a spool and shuttle factory, should be Greenville, N. C., and not Greenville, S. C.

Shelton Siceloff, Bethany, N. C., has completed his flour mill.

Martin county, N. C., will build a new court house. Board of County Commissioners, Williamston, N. C., can give particulars.

John D. Waddell & Wagoner will establish a saw and grist mill at Salem Chapel, N. C.; have purchased part of machinery.

The Atlantic, Tennessee & Ohio Railroad is to be extended from Statesville, N. C., to Taylorsville.

At Forest City, N. C., work has been commenced on the new railroad which is to connect Marion, N. C., with Georgetown and Charleston, S. C. The road is to be built between Marion N. C., and Gaffney City, S. C., by the Massachusetts & Southern Construction Company. From Gaffney City the road will run to Chester, thence one branch will run to Georgetown and another branch to Charleston.

#### TENNESSEE.

A company has been organized in Nashville, Tenn., for the purpose of manufacturing and introducing the Automatic Daylight Gas Machine. The members of the company are H. W. Buttorff, John D. Anderson, Jas. G. Aydelott, John O. Treaner, H. B. Anderson, W. H. Johns, W. F. Foster, W. S. Johns, W. H. Berry. Geo. R. Buchanan.

J. T. Kimsey, Tullahoma, Tenn., expects to build an organ factory soon.

The Citizen's Gas Company, Knoxville, Tenn., previously reported as organized, have awarded the contract for their pipe and will soon commence the construction of their works.

A new gas company will probably be organized in Memphis, Tenn.

Eskin & Griffiths, Chattanooga, Tenn., intend to build a grain elevator.

P. F. Crook, Concord, Tenn., has organized a company to mine mica.

The County Court, Newbern, Tenn., have appropriated \$14,000 to build an iron bridge.

J. W. Reid, Denmark, Tenn., will add saw mill machinery to his grist mill.

C. T. Brause, J. C. Nelson, C. Brause, W. J. Hanley and E. E. Young have organized the Emery River Coal & Coke Co. to mine coal, make coke, etc. Address Houkville, Tenn.

J. H. Randolph has received contract for building a \$10,000 court house at Newport, Tenn.

The Southern Machine Co, Shelbyville, Tenn., previously reported, have capital stock of \$18,000. The cost of their works is about \$10,000. The Sherman Manufacturing Company, Jackson, Tenn., are building an additional machine shop.

The foundry and machine shop buildings now being erected in Johnston City, Tenn., are about completed and the machinery is being put in. T. A. Watson can give particulars.

A saw mill is being put up at Garland, Tenn. Anthony & Wright can give particu-

A saw mill is being built at Rialto, Tenn. The Knoxville Woolen Mills, Knoxville, Tenn., have put their machinery in position

A company is being organized in Tennessee as the Knoxville, Sevierville and Big Pigeon Railroad.

and are nearly ready to start up.

John Ingram of Vanceburg, Ky., contemplates establishing a plow factory in Chattanooga, Tenn.

VIRGINIA.

The Roanoke Navigation and Water Power Company, chartered at last session of North Carolina legislature, has been organized in Petersburg, Va., with S. P. Arrington, of that city, secretary, and J. D. Cameron, of Pennsylvania, president. Directors: J. D. Cameron, Wm. Mahone, S. P. Arrington, and others. Object is to develop water power for factories; capital stock \$500,000.

W. N. Jones & Co., Petersburg, Va., whose bark and sumac mill was lately burned, will rebuild at once, using water power.

Wm. H. Marshall & C. C. Proctor have purchased the River-Bank Flour Mill, near Harrisonburg, Va., for \$5,500, and will overhaul and repair it and put in operation.

B. F. Camp, of Philadelphia, has leased the Loudon stone quarry, near Leesburg, Va., and will work it on a large scale.

Echols & Sherwood have leased an iron ore mine near Blue Ridge Springs, Va., and will work it.

#### WEST VIRGINIA.

J. P. Clifton & Son, Weston, W. Va., whose woolen mill was previously reported burned, (loss \$20,000,) will probably rebuild shortly.

The Lewiston Mining Co., capital \$5,000, has been organized at Charleston, W. Va., by John Anderson, Ella C. Anderson and others, to mine coal, make coke, &c.

L. A. Carr & Co., Buffalo, W. Va., have purchased a flour mill in Charleston, W. Va., which they will repair and put in operation.

#### BURNED.

Linnville's Saw Mill, Fruitland Park, Fla.; loss \$2,500. Will probably be rebuilt.

Tobacco factory of George W. Nation, Glenville, Ky.; loss \$4,500.

Saw mill of James H. Young, Pocomoke City, Md. Flour mill of Joseph Harp near Middle-

town, Md., Loss \$6,000

Flour mill of Spencer, Thayer & Co., Tab-

ernacle, N. C.
Saw mill of J. B. King, near Buckeye,

Tenn.

Sweetwater Flouring Mills, Sweetwater, Tenn.; loss \$30,000. The proprietors will probably rebuild either in same town or elsewhere.

Woolen and grist mill of Marcellus Rudasill, Browntown, Va. Loss \$6,000.

### LOCKWOOD, GREENE & CO.

### MILL ENCINEERS Office, 65 Westminster St., Providence, R.I.

Carefully prepared plans, specifications and estimates furnished for the construction, equipment and organization of new mills and the revision and improvement of old.

#### The New Pratt Furnaces

Our correspondent at Birmingham, Ala., writes as follows: As printed in the local papers, the facts are that the Pratt Coal & Iron Co. do intend to build two new coke furnaces for iron, and that the engines have been ordered from the Linn Iron Works of this place. Their idea is to secure a home consumption of large quantities of coal.

#### A \$50,000 Coal Company.

WARRIOR, ALA., April 13, 1885. Editor Manufacturers' Record:

The Mabel Mining Co. was organized last Saturday at this place with a capital stock of \$50,000. T. M. Davidson is president, L. K. Moss secretary. Headquarters at Warrior, Alabama. Will commence work at once, mining coal and making coke.

S. C. DAVIDSON.

#### A Big Company.

PETERSBURG, April 11, 1885.

The Roanoke Navigation and Water Power Company has been organized under a charter granted by the last legislature of North Carolina. Senator J. D. Cameron, Pennsylvania, is president, and Mr. S. P. Arrington, of Petersburg, secretary and treas-The directors of the company are Senators J. D. Cameron, of Pennsylvania, and Wm. Mahone, of Petersburg, and Messrs. S. P. Arrington, R. T. Arrington, of Petersburg, and Mr. T. W. Mason, of Northampton county, N. C. The capital stock of the company is fixed at \$500,000, but the stockholders have the right to increase it to any amount they may see fit. The principal office will be in this city, but the company will also be represented in Weldon. Some time during the summer a survey will be made of the entire canal and sites suitable for factories located. As soon as practica-ble, inducements will be held out to capitalists and manufacturers for the erection of factories of every description. It is thought by many to be the most valuable power in the South, and possibly the United States. It will take a year or more to develop fully what we have. The canal is 9 miles long with many sites, and said to be 18,000 horse power. Original cost of property reported to be about \$800,000. Has been neglected for many years and will require heavy expense to develop it fully.

S. P. ARRINGTON, Secretary and Treasurer.

#### Cooperage Factory.

MEMPHIS, TENN., April 10, 1885. Editor Manufacturers' Record

Our stockholders at a meeting held April 3. decided to increase our capital stock \$50,-000, in order to meet the growing demand for our product. As our works already have a large capacity we do not expect to add very much more machinery.

J. L. WELLFORD, Secretary and Treasurer.

#### A Chair Factory.

FELL CITY, IND., April 9, 1885. Editor Manufacturers' Record :

We will open a branch house at Dallas, Texas, by first or middle of May. Will have raw material shipped from Fell City for the first season and contemplate moving our present factory to Dallas within 12 Coombs, Hartman & Co. months.

CHEWSVILLE, MD., April 14th, 1885. Editor Manufacturers' Record

I am building an elevator; capacity about 10,000 bushels; size of building, 30x40 feet; 30 feet height to the square. We are working at the foundation now and expect to have the same complete about the 1st of July.

B. A. BETTS.

#### McEnery Quarry.

ALEXANDRIA, LA., April 11, 1885. Editor Manufacturers' Record :

The McEnery Quarry is situated upon a track of land consisting of 1,400 acres intersected by the Texas & Pacific Railroad, immediately upon which the present quarry is now being worked.

The abundance of the stone which extends to the river front, and being a continuation of the same deposit that passes throughout the entire tract, has induced the owners to commence quarrying upon the river front, and there to establish a perma-

This tract of land is situated in the Parish of Rapids, State of Louisiana, twenty four miles above the town of Alexandria, and is about midway between New Orleans and Marshall, Texas. It is the only known deposit of stone of a character suitable for all mechanical purposes that exists in the State, hence the advantages will be much in its favor in furnishing the Southern market.

The stone is specially suited for flagging and street purposes, and has been used to some extent by the Texas & Pacific Railroad as ballast.

It has been submitted to a thorough analysis by a special and practical geologist, who pronounces it the best quality of sand stone. having a specific gravity of 165 pounds to the foot, resisting heat and cold equally as well if not better than granite. It is suitable for all building purposes, readily susceptible to the chisel, and capable of receiving a high polish.

The quarries located are yet far from being fully developed, as the owners have had some trouble and delay in procuring experienced workmen. They are now building houses and making all necessary improvements, in order to facilitate the work, and will in a short time be fully prepared to meet all demands.

The present head quarters of the company are at Alexandria, La.

#### A Fine Machine Shop.

JOHNSON CITY, TENN., April 9, 1885. Editor Manufacturers' Record:

Buildings for foundry and machine works at Johnson city are about completed; engine and boiler are being put in, and machinery is arriving. Expect to start up within forty days. Machine shop, two stories, 50x100 T. A. MATSON. foundry, &c., 90x125.

GEORGETOWN, Kv., April 7, 1885 Editor Manufacturers' Record:

John Clark, for many years engaged in carriage manufacturing here, has converted his establishment into a planing mill, which began operations to-day. The mill is fitted up with all the modern appliances, and is first-class in every particular. Mr. Clark is a thorough mechanic, and will doubtless succeed well in the new departure. This is the second establishment of the kind started in this city during the last six months. Thomas Story has started a large hennery in this city with brilliant prospects of success. Mr. J. H. Kutner has also engaged extensively in the same business, and if competion is the life of trade, they may expect large returns on their investment. This is a new business in this locality. One of the largest queensware establishments in Central Kentucky has just been opened here by W. S. Elgin & Co. The well-known character of the firm is a guarantee of its success.

L. A. SLADE.

TUSCUMBIA, ALA., April 10, 1885. Editor Manufacturers' Record

There is talk of Memphis & Charleston Railroad building their shops here, this being near the center of their line and a very healthy country. They have never rebuilt their shops at Memphis and I suppose they will have to build somewhere so

A. S. STANLEY.

#### New Saw Mills.

CHARLESTON, W. VA., April 6, 1885. Editor Manufacturers' Record

I have, sold a saw mill to W. J. Smith & Bro., Milton, W. Va.; a new 12x20 Mansfield engine and tubular boiler to C. M. Hufman, for flouring mill at Little Sandy, Kanawha county, W. Va., started up last month; to Sill & Meeker 10x16 Mansfield Detached Portable Engine with locomotive, boiler and mammoth circular saw mill, to be located at Jarrett's Ford, on Elk river, 12 miles above Charleston; will start about April 15th.

O. H. MICHAELSON,

KNOXVILLE, TENN., April 8, 1885. Editor Manufacturers' Record .

It is reported that a partnership has been formed between P. F. Crook, C. S. Crook and Thos. Calloway, of Concord, Tenn., under the firm name of P. F. Crook & Co., for the purpose of developing and working the mica mines in Fannin county, Georgia.

A cigar factory is about to be established at this place by H. Levy & Bro., of Coldwater, Mich. H. N. SANTON, JR.

#### Machinery Wanted.

BRIDGEPORT, PUTNAM Co., FLA. April 9, 1885.

Editor Manufacturers' Record

There is to be a brick yard started here and some machinery will be wanted; makers will please send catalogues and lowest prices with best terms. John T. Carey has failed to put in the saw mill here, so there is an opening for a good live man at that business

MITCHELL RENZ.

WARSAW, KY., April 12, 1885. Editor Manufacturers' Record

I am at present building a new full rolle flouring mill of 50 barrels capacity, and expect to have the model small roller mill of the country; building of brick and stone, 30x 50 feet; engine room 18x40 feet; main build ing 3 stories high; metal roof, &c.

GEO. F. THOMPSON.

#### New Enterprises at Mt. Airy.

MT. AIRY, N. C., April 9, 1885. Editor Manufacturers' Record

Booker, Belton & Co. have built a lumber mill and sash, door and box factory. Sparger Bros., McKenny Bros. and J. P. Rawley have each built large tobacco factories

OWENSBORO, KY., April 13, 1885. Editor Manufacturers' Record

We will build a two-story addition to our planing mill in a few weeks; size 30x60 feet, and expect to roof with iron roofing; will also put up a fire-proof boiler house.

J. R. OSBORNE & SON.

#### More Industries Starting Up.

READING, PA., April 14.-The Philadelphia Bridge Works, at Pottstown, which were working with a largely decreased force, has received a contract involving the construction of 700,000 pounds of manufactured iron for the new steel works at Pottstown, which are to be the largest of the kind in the Schuylkill valley. With the starting up in the new nail works of Ellis, Lessig & Co., Pottstown will experience a revival that has not been felt for 18 months.

MOUNT CARMEL, PA., April 14 .-- After a suspension of 14 weeks work was resumed at the Pennsylvania colliery this morning. The mine gives employment to 800 men, whose earnings annually approximate \$350,-000. During the long idleness the employees have been cared for by the business men of Mount Carmel, who are jubilant over the prospects of a speedy return of the amount they have expended in the support of the miners' families.

### Law Department.

Edited by B. Howard Haman, Attorney at Law Baltimore, Md.

It is the province of this Department to reply to enquiries that may be made by our patrons respecting the legal aspects of any matter that may arise in their business. Any questions as to doubtful points of law will be answered without charge in this column. All questions submitted must be accompanied by the name and address of the sender, not however, for publication. Letters should be addressed, Editor Law Department, Manupacturers' Record.

LYNCHBURG, VA., April 8, 1885. Editor Law Department,

Manufacturers' Record :

Dear Sir-Does a citizen who mails a letter to a lottery dealer ordering lottery tickets and enclosing the funds to pay for the them, thereby commit an offense against the United States?

\*Reply—No. The statute prohibiting the

use of the mails for such purposes applies only to lottery dealers and others using the mails for purposes of deception.

BALTIMORE, April 13th, 1885.

Dear Sir-A few days ago a man offered to sell me a machine for a certain price and agreed to keep the a machine for a certain price and agreed to keep the offer open until 4 o'clock the following day. I called upon him before that hour the next day and accepted his offer, when he informed me that he had already disposed of the machine. Can I not recover against him for breach of contract?

Reply-According to your own statement of your case, no. The contract, the breach of which you complain of, was to keep the offer open until the following day at 4 o'clock, For this there was no consideration; and he cannot be held to such an agreement. Had you paid him anything to keep the offer until the specified time, the case would have been different.

CUMBERLAND, MD., April 10, 1885.

Dear Sir—What restriction, if any, exists in the State of Maryland upon the right of a corporation to acquire real estate?

Reply-The answer to your question is to be found in Article 40, Section 48 of the Revised Code, which empowers corporations to hold and enjoy as much property, real, personal and mixed, as "may be necessary or proper to enable said corporation to carry on the operations or fulfill the purpose named in its certificate of incorporation.'

BALTIMORE, MD., April 10, 1885.

BALTIMORE, MD., April 10, 1885.

Dear Sir.—I hold the promissory note of a citizen of Maryland, which is now barred by the Statute of Limitations, being over three years due. My note however is under six years. Will the fact that my claim is barred here prevent me from issuing a foreign attachment in Pennsylvania, where my debtor has assets, and where I am informed the period of nitation is six years?

Reply—No. The question of limitation is

matter of evidence and applies only to the former when suit is brought. The Pennsylvania limitation law would govern in this

THE Magazine of Art for May is a gala number. It is adorned with five full page illustrations, besides smaller ones on alm every page. The frontispiece is a study of a head, a fac-simile in color, from the original by Sir Thomas Lawrence, in the British Museum. The other page pictures are "The Petition," from the original by Josselin de Jong, "The Deben above Woodbridge," by Lance Speed, "The Head of Orpheus," from the painting by Gustave Moreau, in the Luxembourg gallery, and "David" by the same artist. "East Suffolk Memories," a charming descriptive sketch by Mr. Sidney Colvin, illustrated by Mr. Lance Speed, opens the number and is followed by a just and appreciative biographical sketch of that much discussed French painter Gustave Moreau, by Claude Phillips, "Pictures of Fence," a bright account of the swordsman's art, by David Hannay, is especially commended to the consideration of that growing organization of New York City, the Fencing Club, which will be sure to admire the curious cuts that illustrate the mysteries of "Carte and Tierce," "The Art of Periclean Athens" is dealt of by L. R. Farnell, while Richard Heath continues his amusing studies of the "Fashions in Waists,"—Cassell & Company, Limited, New York. \$3.50 a year. and appreciative biographical sketch of that

#### Changing the Gauge.

Capt. J. W. Craig, of the Charleston and Railway, is in the city and will leave to-night for Atlanta and the West, visiting Cincinnati, Chicago and other Western centres, with a view to inspecting the various means and methods adopted by the leading railroad lines relative to a change of their track gauge.

The management of the various railroads in the South are contemplating the advisability of making a change in the gauge of the roads during the coming summer. The present gauge of most of the railroads south Wilmington is five feet. When the change is made it is proposed to adopt a gauge of four feet eight and a half inches, which is the standard gauge at the North and West. The five-foot gauge at present extends as far north as Wilmington, N. C .; Danville, Va.; Cincinnati, O.; and points in Illinois. In the shipment of freight, North or South, this difference in gauge necessitates a transfer of cars at those points where the gauge is changed, and in the movement of passenger trains the trucks of each coach have to be changed according to the grade of the road. The object in adopting the standard gauge is to do away with the cost and inconvenience of changing the trucks and to expedite the movement of freight.

There are, in round numbers, 130,000 miles of railway in the United States, embracing as many as 18 different gauges, ranging from two feet up to six feet. Four hundred and thirty of the roads have a fourfoot eight and a one-half inch gauge, 118 have a three-foot gauge, 78 a five-foot gauge and 54 have a four-foot nine inch gauge The five-foot gauge extends over about 14. 000 miles of railway, and is confined mostly to the Southern railroads. The extent and importance, therefore, of the movement to adopt the standard gauge is very considera-

It is understood that the Louisville and Nashville Railroad will make the change during the year and the Western and Atlantic will follow. The gauge on these roads is also what is known as the broad gauge. It is proposed to change it also to the standard gauge of four feet eight and a half inches, or three and a half inches narrower than at present. The work of changing the gauge is extremely interesting. A force of men will be put along the roads sufficient to make the change in the shortest possible time. One rail only will be moved, and the rails will not have to be disjointed. In that way, aided by special machinery for draw. ing the spikes, the work will proceed very rapidly. The advantages to grow out of the change on the Louisville and Nashville are numerous. The standard gauge is in use on all the roads north of the Ohio river. Freight will come all the way from the North and West without the change of

North and West without the change of trucks or transferring of goods. Under the present arrangement trucks are changed at the Ohio river, and the delay thus occasioned frequently causes freight blockades.

The changes on the Charleston and Savannah Railway and the entire Plant system will be made, probably, some time in August, and will be done in two days. The Charleston and Savannah will be changed the first day, and the Savannah, Florida and Western, from Savannah to Jacksonville, the second day.

the first day, and the Savannah, Fibrica and Western, from Savannah to Jacksonville, the second day.

Capt. Craig will be absent about a month, and upon his return will submit a report, embodying the results of his observations. Arrangements will then be made to change the gauge at as early a day as posssible which will probably not be earlier than August. The rolling stock is now being built, gust. The rolling stock is now being built, whenever new cars or locomotives are ordered, with a view to the change. The locomotives which have been placed on the road during the past year were all built so that with very slight changes occupying but a few hours time their gauges might be altered to conform to that adopted by the road. About half an hour is now consumed in changing trucks at Wilmington on every through Pullman car to the North and about ten minutes. man car to the North, and about ten minutes to every freight car. This delay will be ob-viated by the adoption of the standard gauge, and a quicker schedule will be ob-tained.—Savannah News.

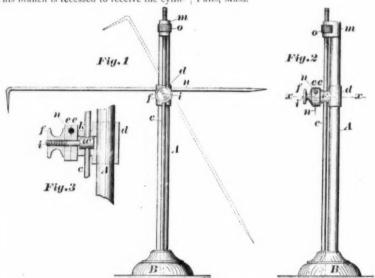

#### Stevens' New "Exact" Surface Gauge.

This gauge is claimed to be superior to all others in its quick and fine adjusting powers, and especially in the grasp of its pointer. This, tightening on to one of the rods, and moving only with it instead of sliding upon it as others do, is held perfectly firm in all of its adjustments.

In this tool the post A is rigidly fastened to the base B in the usual manner. At the top of the post is the nut guide m, for nut O. The adjusting rod c is guided at the top in a hole through m, and at the bottom in a hole in the base B. By means of the nut O the rod and attached parts can be adjusted ver-The support d is made with a branch k, through which the rod c passes This branch is recessed to receive the cylinent to those accustomed to use such tools. By having a hole drilled in the base, it is also adapted to a Depth Gauge and various other purposes.

Small size.—The basis is of cast iron. round, and turned true with the upright spin-The total height is eight inches, and will scratch 8 inches sideways and 13 inches high. The cast steel needle is pointed on each end, one of which is bent to a right angle. All parts are polished and accurately fitted. Large size.-Same, only weight is two pounds, and arm will scratch 101/2 inches sideways, and 18 inches high, These points, together with its simplicity, as shown by the cut, make it a most desirable tool for practical mechanics.

These surface gauges are made by J. Stevens & Co., (P. O. Box 153,) Chicopee Falls, Mass.

STEVENS' NEW "EXACT" SURFACE GAUGE.

STEVENS' NEW "EXACT

drical head w, of clamp screw i. passes through head w and branch k. The pointer n is held between two clamps e, e, as clearly represented. This permits of turning the pointer and clamps on the screw i, and of binding the whole by meams of nut f.

It will be understood that the mechanism carrying the pointer can, when the nut / is loosed, he readily moved up or down the post, that when the nut f is tightened, it clamps this mechanism to the rod c, but that by turning nut O, the pointer can be adjusted a short distance up or down to bring it to the exact position required, after it is otherwise securely clamped. The advantages of providing for this adjustment will be appar-

#### Literary Notices.

The editions of The Century Magazine are now so large that it has become necessary either to go to press at an earlier date or to postpone the day of issue. The latter alternative has been accepted. The April number, the edition of which was 225,000, was delayed until the 25th of March. The May number-edition, 250,000-will be issued on the 1st day of May, thus inaugurating with the first number of the thirtieth volume a change which has long been considered desirable by the publishers, and which it is believed will be heartily commended by the public. Future numbers of The Century Magazine will be issued on the first day of the month of which each bears date.

WATCH AND CLOCK MAKING, by David Glasgow. Cassell & Co., limited, New York, gow. Cas publishers.

This is the latest volume in the series of Manuals of Technology" published by Messrs. Cassell & Co., and is of the same high order of merit as those that have preceeded it. It is illustrated with 69 diagrams of watch and clock movements and is intended not only as a text-book for technical classes, but is designed also as a book of reference for the practical workman.

BIOGRAPHICAL DIRECTORY OF THE RAIL-WAY OFFICIALS OF AMERICA. Railway Age Publishing Company, Chicago, pub-

This volume of nearly 300 pages contains an alphabetical list of the general and division officers of all railways on the American Continent, with a record of their railway service. It is a most excellent work that will doubtless meet with ready sale, as it gives much information that is constantly needed.

T. A. PERRY, of Plymouth, N. C., advertises in this issue the "Plymouth Iron Works" for sale. These works are located in a rapidly-developing State where the manufacturing interests are steadily increasing, and where machinery of all kinds is in demand. The property can be purchased to and where machinery of all kinds is in de-mand. The property can be purchased to good advantage as to price and time of pay-ments. Descriptive circulars will be sent ments. Descriptive circulars upon application to Mr. Perry.

#### National Commercial Convention of 1885.

To be Held at Atlanta, Georgia, May 19, 20 and 21.

CHAMBER OF THE EXECUTIVE COMMITTEE, ATLANTA, GA., April 4, 1885.

In view of the unsettled condition of the finance and commerce of our whole country, and in obedience to suggestions received from centers of trade, labor and production in the East, West and South, that some united effort should be made to prevent the business affairs of the people from suffering the evils of further depression and stagnation; in pursuance of the views of some of the ablest financiers in this and other sections of the Union, and that the most representative business men of the whole country may have the opportunity to confer together and consider the most effective means to better the business interest of the country. the citizens of Atlanta have determined to invite delegates to a National Commercial convention to assemble in this city on the 19th of May next.

This movement has already been commended by many of the wisest and most conservative leaders in commerce, finance and transportation throughout the country with whom we have been able to consult. We believe that a National convention whose representation is confined rigidly to those who are active and experienced in the business affairs of the people at large, and in which the discussions will proceed upon the intelligent, non-political and practical principles of trade, exchange and traffic as pursued in the United States, will not only command the attention and sympathy of the country, but will give direction to public opinion in ways that will make it commanding upon national legislation.

The assemblage will be one in which the representatives of the several sections of the Union can best be informed of the controlling interests and demands of their respective constituencies, and in which the means of best harmonizing the rights and complaints of all may be intelligently agreed

upon and recommended.

The time, the interim between the inauguration of a new administration of national affairs, and before the meeting of a newly constituted Congress, and while there are pending before the authorities and people of the country important propositions for treaties affecting the foreign relations and commerce of this government with other countries, will be most opportune for a full and representative business discussion of these important questions of our near future. Our domestic monetary and commercial relations are also the subjects of important pending legislation. Thus, the subjects that will be presented for the consideration of the convention cannot fail to commend themselves to the attention and study of all thoughtful business men throughout the

To the end, therefore, that the largest number of communities in the nation may have respresentation in this convention, and its current suggestions and results, the committee desire that all corporate towns and cities, and commercial bodies therein, that may be entitled to representation as hereinafter stated, shall select delegates of such character and ability in commercial affairs as will add force to and obtain respect for deliberations and decisions of the convention.

Our object in proposing and organizing this important meeting, is to have it result in the largest possible betterment of the business affairs of the whole people of the United States. In this endeavor, we ask the hearty co-operation of every business man and capitalist throughout the country.

Atlanta, as is well known, is a railway center easy of access from all parts of the country. Her hotels and facilities for entertaining large numbers of people, are unsurpassed. The month of May is one of the most delightful of the whole year in this climate.

At a recent meeting of the National Association of Railroad Passenger Agents, held in New Orleans, the matter of rates was presented and referred to the Southern Association, which meets on the 8th of April. It is understood that the rates to the convention will not exceed one half fare. and probably will be much less. Information with regard to this matter will be furnished at an early day. It is the purpose of the committee to arrange as far as possible to give the delegates, on the two days of the week after the adjournment of the convention, excursions to places of interest and importance. The Georgia Pacific Railroad Company has already volunteered the free use of a train to take delegates to the coal and iron fields of Georgia and Alabama.

#### PROGRAMME.

First. The convention will be composed of delegates to be selected, as follows: Every local body organized for general commercial, and not for special private purposes, shall be entitled in this convention to the following representation: Each association having fifty members or less, shall be entitled to one delegate; associations having more than fifty members, shall have one other delegate for each additional fifty mem bers, to be appointed by the association. Any city or town of two thousand inhabitants not having an organized body as above shall be entitled to one delegate, and towns of over two thousand inhabitants shall have one other delegate for every additional five thousand inhabitants. Delegates to be appointed by the mayor or chief magistrate.

The Governors of each State shall be eligible as delegates, and each State shall be entitled to two additional delegates at large, to be appointed by the Governor.

Second. There are to be eight national delegates, to be selected by the executive committee.

Third. All delegates shall present credentials under seal from their respective constituencies; said credentials shall certify the number of delegates to which the constituency is entitled.

Fourth. The subjects to be considered

Ist. Commercial and reciprocity treaties between the United States and foreign countries.

- 2d. A national bankrupt law.
- 3d. The compulsory coinage of silver.
- 4th. Railway transportation.
- 5th. Such other questions touching national financial and commercial interests, as the Convention may deem proper for discussion and action.

### Adjustable Dado or Grooving Head.

The accompanying illustration shows a patented dado or grooving head, which, while it is very simple, possesses most excellent features as can readily be seen by examining the cut. It will readily commend itself to wood-workers. It consists of two composition flanges provided with adjustable scoring knives, which need be moved, however, only to compensate for wear; and adjustable and interchangeable routing knives of any desired widths from 5-16 to 11/2 inches, corresponding to the widths of grooves to be cut, and which can be easily and quickly changed. The work done by these heads is equal in quantity and quality to that done by those of the common construction.

When set for a 5-16 groove they take up 1 1/8 inches room on the arbor, and for wider grooves as much more room as the groove is wider than 5-16 of an inch.

the Baltimore Manufacturers' Record, send us \$3 and you will receive it regularly for one year, or six months for \$1.50.

#### Jellico Coal.

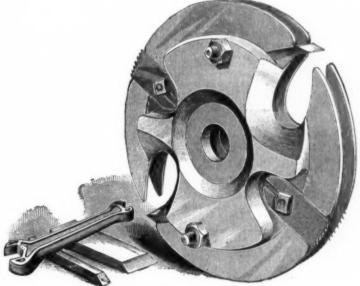

#### A Discovery That Changed the Characteristics of the East Tennessee Trade.

A few weeks ago we gave some interesting facts about the Jellico coal region of Ten nessee and Kentucky, and in the Nashville Union of April 12, Prof. Henry E. Colton, in writing from Newcombe, Tenn., of the same section, says: "This neat little town which perpetuates the name of one of the best civil engineers of the South, is located three miles from the Kentucky line, on the Knoxville & Ohio Railroad. The valley of the Elk fork of the Cumberland is divided by a singular uplift of rocks into the local terms of Upper and Lower valleys. The first is rolling in its topography, and partakes of the influences from the high mountains, the latter in almost a dead level; and as unvaried in its geology and agricultural features as in its surface. The line of the Knoxville & Ohio Road runs though it in an almost unbroken tangent; the little river has a tortuous and sluggish flow, first on one side and then on the other, while on the east the sharp unbroken line of Pine Mountain rises suddenly, and on the west is the Jellico Mountain with its broken ranges.

On each side and underneath is coal, the thrift of the town is built on coal, and the railroad tracks are covered with cars loaded or to be loaded with coal. What better of the Sewanee field. Below it about 100 feet is a two foot coal, and still lower cannel coal in blocks. How far still lower is the conglomerate there is no possibility of determining in this section.

The area underlaid by this coal is extensive. I have stated that the valley formed by Elk Fork of the Cumberland is cut into two parts by a great fault which is called Hell's Point and the Gorge. This fault is local, and runs in a line N. 25° E. West of it the strata are regular and the coal in them lies nearly horizontal, with a slight rise to the northwest. The Jellico Mountains commence near the Elk Gap, on the southwest, and run west of the line of this fault about eighteen miles into Kentucky. Its highest points are on the southwest end, and as the valley drops so does its summits So far as I can now say the coal strata, except for local changes, is nearly level from southwest to northeast. The same Jellico coal is in it at the upper end as at the lower, but owing to the greater elevation of the valley is nearer the general level of the surface. Viewing these facts it is somewhat of a wonder that the great coal development of the lower valley had not been shared by the upper, but it shows the old bell-weather principle exists in people as well as sheep.

The excellent coal was found near Newcombe, and the idea immediately prevailed that it existed nowhere else; it is certain

ADJUSTABLE DADO OR GROOVING HEAD.

evidence of the future great possibilities of the place. Not five years ago it was a field in indifferent cultivation, worth perhaps \$10 per acre, and the surrounding mountains simply good ranges for cattle, hardly valued at \$1 per acre. Now town lots sell at \$200 to \$400 per acre, and the mountain land near the depot has all been bought up at from \$25 to \$40 per acre. Coal did this, Jellico coal, a discovery which has nearly changed the characteristics of the coal trade of East Tennessee. Here is the original and best grade of the now famous Jellico coal, a coal which put into the Nashville market, even at the high price it is sold there, will always be used by those who have tried it once. is a hard, black coal, lighting quickly, burning up somewhat rapidly with a bright flame, almost like pitch pine, and leaving little ash of a reddish hue. As a steam coal, for quick, hot fire, like locomotives, it has no superior, but is too far from Nashville to enter that market for that purpose.

Geologically the position of this coal has not been positively determined; the floor is a fire clay filled with stegmaria; in the roof slate are impressions of sepidodendron of several species, and the same are also found in the accompanying sandstones. This, according to Dana, is positive proof that the strata belong to the lower coal measures of Pennsylvania, what I have classed as the middle measures of this State, but it is impossible to identify it with any of the coals

that its quality is not so good as it goes toward Kentucky. The two largest operators in this field are the Standard Coal Company and the Jellico Coal Company. The last was the first opened, but the first is most complete in its plant and improvements Both are located near Newcombe, and have their branch roads coming into that depot. The capital of the Standard Company is nearly all from Knoxville, though the General Manager, Col. J. F. McClure, is a Kentuckian. He has planned and superintended the whole arrangement, and has drawn to it an experience derived from the operation of many other mines. The president and treasurer is Maj. E. E. McCroskey, of Knoxville, a gentleman of great abillity as a financier and reputation as a business man. To him was due the great success of the Central Coal Company at Coal Creek, a small concern, it is true, but one which made enormous profits.

The organization around the mine is equally good; everything is worked in the most systematic manner. It is located about two miles from the station, and is connected thereto by a wide gauge road 7,700 feet long. The coal is brought from the mine over a narrow guage road 2,600 feet long and dropped to the shute by an incline 700 feet long, with a vertical height of 300 feet. The mine opening was commenced July 1, 1883, and the first coal was shipped February, 1884. From February 1, 1884, to March

1, 1885, 64,083 tons of coal have been shipped. The total cost of the mine opening, plant, etc., was over \$190,000, and the capital stock is \$500,000.

There is now employed in the operations of the mine about 150 men. I averaged a number of days work of the mine force and the amount ranged from \$1.70 to \$2.05. The houses for the hands are neat outside and comfortable inside; of them they now have ninety and are already building more.

Thus it will be seen that this operation gives employment to an average of 150 men, feeds over 1,000 persons; already loads a train of cars on the Knoxville & Ohio each day, and furnishes cheaply to the world a first-class article of fuel, and this is only one of the many such industries as are making East Tennessee increase in wealth and population. But one point I have not noted; through the energy of Maj. McCrosky and the liberality of the East Tennessee, Virginia & Georgia Railroad, this coal is now being placed at the harbor of Brunswick, Ga., for supply of steamers, and already a brisk trade has opened up. Newcombe has other industries which I have not space to note fully here. One is the excellent saw and planing mill of Rodahafer & Co., where complete houses are made ready for shipment and erection."

### **Б**НЕ **Ш**АҚҚЕЛS.

OFFICE MANUFACTURERS' RECORD, A
BALTIMORE, April 14, 1885, 9

The war talk in Europe has caused active speculation in wheat with a decided improvement in prices, and should war be declared it is altogether probable that a still greater advance in prices would quickly follow. In fact an Anglo-Russian war would almost surely result in a general revival of business in this country with a much higher range of prices than for some time, except in cotton, which would probably decline, but whether such a war would prove of permanent value to America admits of serious doubts. England is our best customer and any event that would lessen the purchasing power of the people of that country would be seriously felt in America. It is moreover much better that business should not receive any such stimulus, whether it be temporary or permanent, if it is to be secured at cost so great as thousands of lives.

The market for manufactured iron has shown no improvement and trade is dull, with prices nominally as quoted, viz:

" 14 to s, round and	.84
	.80
50 11 OR .	
	. Bc
Hoop Iron, 11/2 wide and upward " side s	36c
	16€
Horseshoe Iron " a3460 3	0
Norway Nail Rods " 5 @ 5	160
Black Diamond Cast Steel " 9 @ to	0
	160
Spring Steel " 3140 4	6
Common Horse Nails " 8 @ 9	0
Railroad Spikes, 51/29-16 " 2 @ 2	160
Perkins Horse Nails R keg. \$3.7	23/2
Mule Nails 84-7	23/2

In pig iron there is no change, the sales being moderately fair for immediate consumption, but the market lacks animation and prices continue depressed. There are signs of considerable activity in the building of new furnaces in the South in the early future. We quote prices as before, viz:

#### HARDWARE.

Trade continues only moderate and dealers do not appear to anticipate any decided improvement shortly. The hardware rusiness like many other interests, is quiet and demand but fair, though there are of course some special lines in which trade is good.

The screw market is badly demoralized and prices still further cut by some of the manufacturers, who have issued new discount circulars. The Dayton Screw Company have issued a circular from which we take the following:

"Our price-list of wood screws, adopted January 15, 1885, will remain unchanged, out until further advised our discounts will be as follows

Flat Head Iron Screws...... 50 per cent.
Round Head Iron Screws... 40 "
Flat Head Brass Screws... 50 "
Round Head Brass Screws... 35 "

Round Head Brass Screws.... 35 "
For flat head blued 2½ per cent. will be added to the net amount of invoice. Discounts subject to change without notice. All orders received subject to our ruling prices at date of shipment. All orders will be received subject to the amount of our production, and will be executed as promptly as our facilities will admit."

The Russell & Erwin Company have made

The Russell & Erwin Company have made even a greater reduction, putting their discount at 90 per cent.

It will be noticed that "all orders received will be subject to ruling prices at date of shipment," and as there is no certainty when shipments will be made or what the prices may then be, buyers who would like to take advantage of these low offers, will be rather in the dark as to what their goods may cost them as there is no knowing what prices may be at the time of shipment. Efforts have been made since these prices were announced to buy large quantities of screws made by the firms that are cutting prices, but it is claimed that no orders would be booked except upon the terms already stated. Some of the screw manufacturers have refused to join in the cutting and are still selling at the former price, 80 & 10, but they will fill orders promptly as received at these figures and not accept them subject to indefinite future prices. Among these companies is the American Screw Company, of which Messrs. Samuel G. B. Cook & Co., Baltimore, are the Southern agents.

Nails are quoted as before at \$2.15@\$2.20, according to quantity and quality, but these figures could probably be shaded some.

A new hardware commission house has been established in Baltimore, as will be seen by the following circular:

NOTICE OF COPARTNERSHIP.

The undersigned respectfully inform you that they have formed a copartnership under the style of Walsh, Hoen & Von Kapff, for the purpose of conducting the hardware, cutlery and gun business as importers and manufacturers' agents. A full line of such goods as we represent will always be found in our stock, and a share of your patronage will be appreciated and receive proper Very respectfully, attention.

T. YATES WALSH, JOHN HOEN, J. HERMAN VON KAPFF.

### Philadelphia Iron Market.

PHILADELPHIA, PA., April 13, 1885.

The brokers in pig iron report a continu-ance of the unfavorable conditions for weeks past. As to prices, an occasional sale is heard of at unusually low figures, but in such cases the iron is found to be of an "off" character. The makers of the finer and best known brands have gathered up a little courage, possibly in view of the effects which would follow the opening of a foreign war, but it is not evident just at present how the war would effect the American iron trade. Iron buyers are troubled over the difficulty of obtaining shipping, and prices for such stocks of ore and crude iron as are on hand are held with a little more firmness, and hence there is nothing selling as buyers do not need material at present and are not sure that prices will advance. Word comes from the interior of the State that there has been some improvement in merchant iron. A few buyers have looked over the market and are negotiating for supplies, which seem to indicate a little better demand, but taking the market as it is to-day, there is no improvement to report. Medium iron is \$1.60 to \$1.65; refined \$1.70 to \$1.85; nails \$2.15 to \$2.25. Buyers of large lots are obtaining slight concessions for late delivery. Plate

iron is 2 cents; shell 21/2 cents; flange 31/2 cents; bridge iron \$2.10 to \$2.25; other kinds without change. Sheet iron orders continue to pour in for small lots. The makers of wrought pipe report their former observations as to trade prospects. The makers of cast pipe are busy. Small lots of steel rails continue in demand and there is less disposition among makers to shade prices. Old material is in active demand and held firmly. The coal trade is active, and heavy shipments are in progress to Eastern ports.

#### Cincinnati Iron Market Report.

Specially reported by Rogers, Brown & Co., Pig Iron Commission.

CINCINNATI, April 13, 1885. Some improvement in demand for pig iron was noticed at the close of the week. came mostly from the foundry trade, which has been more than usually quiet for a month. Stocks in most foundry yards are light and unless general trade becomes still further depressed a much more active business may be looked for from the small foundry trade. Prices held steady. Southern makers almost without exception have taken a decided stand against further reductions. An utter lack of co-operation among themselves and constant misrepresentation by interested parties as to actual sales, have com bined to hammer prices down unnecessarily they think. Never before have these misleading reports been circulated with such industry. Hereafter the leading furnace companies, before hastening to meet imaginary cuts by their rivals, will take measures to learn the facts. Alabama and Tennessee makers unite in very emphatic testimony that anything further conceded in prices will be so much given to buyers out of the capital of their concerns. Still it is announced that four more large blast furnaces are soon to be erected in Alabama. The following figures, which are for cash, f. o. b., cars Cincinnati, represent actual current sales: they think. Never before have these miscinnati, represent actual current sales

Specially reported by E. L. HARPER & Co. CINCINNATI, April 13, 1885.

The trade is slightly more active, consumption is a little more liberal and orders and inquiries a trifle more numerous. The speck of war on the Eastern horizon gives a little color to the prospects of improved activity in our mills and foundries and brightens the hopes of many. Prices are firmer and well sustained. We quote as prices current, cash f. o. b. or wharf, Cincinnati:

#### Louisville Iron Market.

Specially reported by W. B. BELKNAP & Co., Nails, Wire, Iron, Hardware, Carriage and Wagon Goods.

LOUISVILLE, Ky., April 13, 1885.

Bars are still dull. The bulls do not seem to be able to get in their work beyond the wheat pit. And from the important figures cut by bread stuffs and provisions alone in European telegrams, one would imagine that the war was one of appetites rather than of arms. Mills that claim to be the busiest are those running on better grades or on special-

Nails are about the same as at last writing Both iron and steel are quite active, but with a difference not suggested by late "resolutions in meeting," whose influence on an open competing market do not often amount to much no matter how unanimously they are passed.

Wire.-A good demand for barbed continues, though it has somewhat lessened since the fence-building farmer has taken himself to the plow and is busy putting in his crops. Builders' hardware is reasonably brisk

though scarcely as much so as one expect.

Specially reported by GEO, H. HULL & Co., Com-mission Merchants for the sale of Hot and Cold Blast Pig Iron.

LOUISVILLE, KY,, April 13, 1885. The market for pig iron in the last week has been quiet with very few sales. This condition seems to result from buyers having all they need for immediate use, and not want of confidence in prices. Stocks at furnaces are light and there seems to be no immediate prospect of a change, though if the present dullness should continue for two or three months, as against the additional amount of iron being produced, it would be very apt to have its effect upon the market. We hear of large sales and better demand from St. Louis and vicinity, but the market here is not as good as it was one month ago. We quote for cash in round lots as below: month ago. as below:

PIG IRON,		
Southern Coke, No. 1 Foundry \$16	50@17	50

### THE MACKENZIE PATENT CUPOLA AND BLOWER

Send for Circular to SMITH & SAYRE MFG. CO., Proprietors, 245 Broadway, N. Y.

This Cupola has made a great revolution in melting Iron. It differs from all others in having a continuous tuvere, or in other words, the blast enters the fuel at all points. Above one ton capacity per hour, they are made oval in form. This brings the blast to the center of the furnace with the least resistance and smallest possible amount of power, and in combination with the least resistance and smallest possible amount of power, and in combination with the continuous Tuyere causes complete diffusion of the throughout the furnace, and uniform temperature, melting ten or fifteen tons an hour with the pressure of blast required to melt two or three tons in an ordinary Cupola. It also enables us to save very largely in time and; fuel, the experience of our customers showing a gain of twenty-five to fifty per cent. In time, and twenty-five to forty per cent. fuel over the ordinary Cupola, and a BHTERR QUALITY OF CASTING, especially in light work. This is due to the thorough diffusion of the air and more perfect combustion, extracting less carbon from the irom, making a softer and tougher casting. We manufacture these Cupolas of any desired capacity, numbered from x to 20, inclusive, the numbers indicating the melting capacities in rons. FER HOUR—No. 1, one ton; No. 2, two toms; No. 3, three tons per hour, and so on up to 15, or 20 tons.

We have improved the construction of these Cupolas in every way, have increased their strength and durability, and sought to make them as convenient for working and repairs as our own and the experience of our customers could suggest.

#### A New Farm Fence.

A farm fence should be cheap, ornamental and useful; it should be visible so that stock cannot be harmed by running into it and then having some of it running into them; it should protect sheep from dogs, wolves, and other carniverous fiends; it should be durable, and finally, it should be so easily put up that a country lad can put it up intelligently.

The "Picket Wire Fence" seems to meet all these requirements. It has wooden pickers about 4 or 41/2 feet long placed perpendicularly, with 5 heavy wires crossing them horizontally and holding them securely in place. The picket and wires are placed so closely together that a fair sized dog cannot get through the interstices. It costs no more than a plank fence and it lasts three times as long. It is put up in rolls or bales 70 feet long and is easily handled.

The Covington Picket Wire Fence Co., No. 620 Scott street, Covington, Ky., can give you prices and further information.

### A Fine Opportunity for Investment,

The Plymouth Iron Works combined with Perry's Hame and Baluster Works for Sale.

These works are situated in the town of Plymouth, N. C., and are doing a good business. Owing to a change in my business, which prevents my giving them my personal attention, I offer them for sale. Will sell reasonable and give good time on a part of the purchase money. Write for descriptive circular, with price and terms. Address,

T. A. PERRY,

#### WANTED

Situation as manager or salesman in a woolen fac-tory, by a gentleman who has had over 26 years ex-perience in the manufacture of plain and fancy dress goods, linings and worsted costings.

Address, Box 76,

Post Office, Warrenton,
FAUQUIER Co., VA.

### FOR SALE.

ACRES COAL, IRON ORE, AND TIMBER LANDS IN ALABAMA, ARKANSAS, TENNESSEE.

> W. R. STUART NEW ORLEANS.

### Business Chances.

For the purpose of making the MANUFACTURERS' RECORD a still more valuable medium of communication between its readers North and South, we will publish, FREE OF CHARGE, short advertisements, not exceeding 40 words, from those in the South who have mills, factories, manufacturing sites or water-power for sale, capital wanted for industrial enterprises, &c., &c.; while readers in other sections who desire to engage in manu*l*actures at the South are also invited to use these columns, without cost, either in seeking information regarding the advantages and special claims of different localities, or for asking about good openings for men and money. This department is also free for Southern manufacturers who wish to advertise for mill managers superintendents, engineers, &c.

In corresponding with any of these advertisers please mention the Baltimore Manufacturers' Record.

THE OWNERS of a cotton mill in the South want an experienced man to take an interest in the mill, and take charge of same as manager. The officers and other stockholders have had no experience in running cotton factories, and besides, their time is so fully taken up with other business, that they can not give personal attention to management of the finances or to the saie of the product. Machinery all new, and of the latest improved patterns. The mill is located in a flourishing and rapidly-growing city, with 6 railroads, and river mavigable all the year. Coal is laid at the furnace door for \$1.70 per ton. It is desired that the manager shall have some interest in the mill, and no proposition will be entertained unless the party can put in at least \$10,000. Address A. C. M., care MANUFACTURERS' RECORD.

THE ADVERTISER desires to locate in some Southern town and engage in the manufacture and sale of bottled soda and mineral waters. Would like to be furnished with the names of places needing such an industry, with some information as to their attractions and advantages. Address SODA, care MANUFACTURERS' RECORD.

WANTED.—Partner with \$3,000 or more to engage in the manufacture of furniture. Factory buildings complete; trade established; lumber convenient; shipping point good; railroad runs through the yard; water aho. The advertiser will go in as a partner, furnishing \$500 towards capital, or will work on salary in Gormer, canacity (auperintendent) or as a hand. water also. The autocities will work on salary in former capacity (superintendent) or as a hand Address J. W. G., care Manufacturers' Record.

WANTED.—Situation as superintendent of cott factory; now employed in the South; satisfactor reasons for leaving present place; good reference Address N. C., care MANUFACTURERS' RECORD.

THE ADVERTISER desires to furnish a part of the capital, and join others in starting an oil mill and an ice factory in some good locality in the South.—Address Columbus, care Manupacturers Record

WOOLEN MANUFACTURERS RECORD.

signed desires to take the entire management of some good woolen mill in the Southern States, (has had go year's practical experience,) or would take charge of the finishing department alone. Address P. M. Smith, Auburn, Mass.

FORTY-THOUSAND dollar cotton mill for sale in South Carolina, for division, containing 560 acres of land, merchant grist and saw mills and gin,—all in good running order. For health and natural advantages not excelled in the South. Address W. L. Morgan, Bros. & Co., Crawfordville, Spartanburg Co., S. C.

WANTED.—Situation by a young man as mechanical draughtsman, with patent solicitor, machine shop, mechanical engineer or draughtsman. Graduate of scientific college, engineering and machine shop experience. Reference given. Address S. S. Salter, Hoston, Mass.

WANTED-A man whom has 5 or 6 year's experience with handle and spoke machinery. Addres Dickson & Watson, Pulaski, Tenn.

WANTED.—A hand power brick press that wil make good bricks from damp clay. I must have a guarantee that the machine will do good work; wan to know the capacity, price, terms, &cc. Address W J. Davis, box 104, Wytheville, Va.

I HAVE a good steam flour mill in Tennessee wellocated and doing a good business. My health is bar and it has become necessary for me to withdraw fron business, and I wish to dispose of the mill; will sel a small or large interest, or the whole of it; or will lease; or will put it into a stock company and take good share of the stock; or will sell on long time with a few hundred dollars down. A splendid business can be built up. Address E. R., care MANU PACTURERS' RECORD.

PARTNER WANTED—To engage in a manufac-turing enterprise near Atlanta, Ga. To a man with \$5,000 or \$10,000 to invest, and become identified with the management, this is a splendid opportunity. For full particulars, address Manufacturer, drawer 8, At-lanta, Ga.

SITUATION as superintendent of cotton mill in the South wanted by a gentleman of practical experi-ence. No objection to being in the country. Best of references. Adddress J. B., care MANUFACTURERS' RECORD.

FOR SALE—The Blue Grass Roller Mills. New soo barrel full roller mill, complete in every respect; best wheat elevation in State; attached capacity 30,000 barrels. This property can be bought at a great bargain. Parties owning are all engaged in other business. For full particulars, address Blue Grass Roller Mill, North Middletown, Ky.

WANTED—By a married man a situation as over-seer of weaving in a woolen mill; would prefer to go South; has had 18 year's experience on all kinds of plain and fancy cassimeres and fine worsteds. Good reference as to ability and character. Address Weav-er, care MANUPACTURERS' RECORD.

WANTED—By a married man, a situation as over-seer of spinning in a woolen mill; have had 13 year's experience on fine and coarse stock, and thoroughly understands all makes of Self-operating Mules and Jack Heads. Can furnish first-class reference; would prefer to go South. Address Spinner, care Manu-FACTURENS' RECORD.

FOR SALE.—83 acres of land in half mile of the growing town of Warrior, Ala. About 40 acres cleared; 2 good springs; coal under 73 acres. Great bargain. For further particulars, call on or address S. C. Davidson, Warrior, Ala.

FINE OPENING for an iron foundry. A practical man with character and capital will recieve substantial aid. Address W. R. S., care Manufacturers' RECORD.

VALUABLE WATER POWER for sale cheap; suitable for most any manufacturing business. This is a pleasant town of 2,000 inhabitants, and for climate and health cannot be excelled in the United States, Several kinds of manufactures needed here. Address Willard & Son, Maryville, Tenn.

WANTED—A partner to take half interest in a two press cotton-seed oil mill and cotton mill, or will sell out. Can add other machinery. Good healthy locality. Address W. E. Yancey, Talledaga, Ala.

WANTED.—A party to join me with some capital in a well established cotton gin factory in the South. The gins have no superior. Margins good. Water power used. Timber cheap and abundant. Address "Gin Factory," care of Manufacturess' Record, Baltimere.

BANK WANTED for the town of High Point, N. C. Has two tobacco factories, three sash and door factories, one spoke and shuttle block factory, three cotton factories, one steam grist mill. Population twelve hundred. No banking facilities within fifteen miles. Address E. A. Snow & Co., High Point, Guilford county, N. C.

A DRAUGHTSMAN and Practical Machinist wants a position; capable of managing men, designing and constructing machine and special tools, engines, pumps, &c., sugar and mill machinery, &c. Willing to go anywhere. Good references. Address J. S. G., care of Manufacturers' Record, Baltimore, Md.

WANTED.—Purchaser for 2,500 acres woodlands, including thousands of the finest fancy timbers to be had in the United States, such as walnut, white oak, ash, maple, cypress, pine, hickory, &c. Unsurpassed facilities for shipping lumber to market. Address Mrs. A. C. Watts, Laurens C. H., S. C.

#### COAL LAND FOR SALE.

One of the most desirable coal properties in the South can be bought at an extremely low price. It is located in the great coal district of Birmingham, Ala., and is only two to three miles from that city. It consists of 2,800 acres of Coal Land in fee, and mineral rights, and 1,400 acres under favorable lease for 20 years. There are three good openings on the land-a large seam 7 feet 4 inches thick (coking coal), another 4 feet 2 inches thick, and another 4 feet; two good steam and coking coals, and one good grate coal. A railroad, 5 miles in length along the entire length of the outcrop, would connect the Louisville & Nashville, and Georgia Pacific Railroads. This is one of the finest opportunities ever offered for investment in coal mining in the

For particulars address BIGSBY & EDMONDS, Baltimore, Md.

#### THE BERRYMAN

# eed Water Heater and Pur

The Shells of the Berryman are of C 11 No. 1 iron, and tested to 175 pounds cold water. Every heater is guaranteed to be absolutely tight, making it the only Feed Water Heater applicable to a Condensing Engine, increasing the vacuum and imparting a high degree of heat in the feed water, saving eight to ten per cent.

#### THE BERRYMAN

has been in constant use for more than 12 years in all parts of the United States and Europe, and none have ever needed repairs. It gives the highest result attainable by the use of exhaust steam.

Boller repairs, and the vexation by shutting down when in a hurry, are saved. The trouble and expense of throwing out a poor heater and putting in a good one are saved by the use of THE BERRYMAN FEED WATER HEATER AND PURIFIER.

All Oil or Fatty Matter is excluded from the boilers, as the feed water and exhaust steam do not come in contact by the use of THE BERRYMAN FEED WATER HEATER AND PURIFIER.

ar-cent stamp for new forty-page Illustrated Car MENTION MANUFACTURERS' RECORD.

## D GLOBE ROLLER SKATE,

The Easiest Running, Most Durable, and Most Practical Skate in the Market.

Practical Skate in the Market.

Rink men and jobbers will find the "GLOBE RINK" skate to be superior to all others, because:

It has no springs, rivets or pins to break, get loose or wear out. It will not crush the rubber cushion, as their new connecting plate prevents crushing. The wearing of the bearings being automatic, the truck frame will not become loose or rickety from long usage. The tension is easily regulated by means of the draw-bolt, to suit the requirements of any skater. The truck frame can be instantly detached without removing the draw-bolt. It is light, strong, durable, and skaters pronounce it the best skate made.

We especially call the attention of the skaters of America to our New Half-Clamp Corrugated Steel Bottom Skates, in which we pride ourselves in having the Lightest, Strongest and Handsomest Skate in the World. For prices and catalogues address

MITCHELL & VANNEMAN, RICHMOND, IND.

## Gooch Peerless and Giant Freezers.

since 1879.

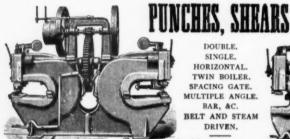

These Freezers have grown into such popularity that they are universally acknowledged by the trade to be without an equal, and are kept in stock by most of the leading deal-ers in every State of the Union.

### ELL'S Patent RAIN WATER CUT-OFF

RECOMMENDED BY ARCHITECTS. BUILDERS USERS, EVERYWHERE.

USERS, EVERYWHERE.

For turning water into or off from the cistern. The handle, which is an iron weight, insures the bucket remaining where placed and entirely prevents its being turned by the downflow of water. The bucket or valve passes behind the rim at the top and overlaps at the bottom, thus securing perfect water joints at both connections. We manufacture all sizes from 2½ to 24 inches; 2½ inch, \$5; 3 inch, \$6; 3½ inch, \$3; 4 inch, \$9; 5 inch, \$4; 6 inch, made of 1X Tin, \$80. These sizes are always in stock.

Packed in crates of one dozen each size up to 5 inch; 5 and 6 inch in crates of ½ dozen each; 6.0. b; no charge for crates. For sale by dealers all over the United States.

G. W. HOWELL, Manufacturer, COVINGTON, KY.
